Collateral Duty Inspector, U.S. Marine Corps, Oceanside, CA (06/2014-2021)

Led 3 CDI's, managed, led, and inspected 12 maintainers' job performance, working extraneous shifts daily consisting of crawling into tight spaces, working in various weathers, providing quality work with reasonable crunch timelines, and lifting 40+ lbs. of tools and a day-to-day basis. Supported over dozens of flights for 3rd MAW, MAG 39, HMLA-469 missions/training, and \$3.5 M+ in consumables, parts, HAZMAT, and tools, while managing communications, training, operations, logistics, compliance, safety, and administration. Supported fleet readiness/officer pilot's exercise. Performed special inspections, repairing airframe structures/components, replacing airframe structures/components, recovered disabled aircraft in an austere environment with limited tools/HAZMAT, while performing the billet of HAZMAT Non-commissioned officer, responsible for over 100 HAZMAT worth over \$65,000.⁰⁰ in Yuma, AZ

Awarded

- The first 28-day special inspection found advanced stages of corrosion on the airframe structural cross tube, located above cross tube landing gear, showing negligence on previous inspections. If left untreated, it would have caused significant damage to the aircraft, pilots, and crewmembers, causing significant loss of person-hours, millions of dollars of collateral damage, and damage to troop morale.

Work Center Supervisor, U.S. Marine Corps, Oceanside, CA (01/07/2020-Present)

Managed maintainers and CDI's inspectors to comply with the work center's maintenance to support missions/flight hours. Managed appointments, training, operations, logistics, compliance, administration, vacations, counseling, and mentoring to team members daily through leadership and communications. Promoted, Awarded.

- Managed and maintained preservation of multiple aircraft,

Helicopter Airframe Mechanic UH/AH-1, U.S. Marine Corps, USS Green Bay, Okinawa/East China Sea/Australia (05/25/2018-12/14/2018)

Assisted missions in various mechanical jobs supporting various flight-critical missions in allied waters and enemy waters, assisted with maintenance on a disabled aircraft by locating a specific bolt around the ship for its return, avoiding the need for a crane to lift the aircraft, and towing it. In assisting with the job, the Marine Corps saved thousands of dollars by avoiding the extra workforce, fuel, and cost of a crane.

Touched up the paint on bare metal to prevent corrosion, painted logos on aircraft, re-torqued bolts on the tail boom, removed and installed reservoir systems as well as primary rotor actuators.

- Achieved a Letter of Appreciation for helping preserve friendly relations and ties with foreign countries by volunteering to clean areas in Okinawa, Japan, with the United Service Organizations and the SgtMaj of HMLA-469.

Helicopter Airframe Mechanic UH/AH-1, U.S. Marine Corps, Oceanside, California (23/JAN/2018-Present)

I started my career as a helicopter mechanic by assisting in maintenance, preserving the shop's cleanliness, and cleaning areas that needed an inspection.

Alfredo Orquiz

- Achieved specific quantifiable measurable objective outcomes thru inputting ##tools ## manpower, and ### resources for ## duration and ### frequency. Awarded

Certified Nurse Assistant, Avalon Care Center, Federal Way, Washington (07/2016-03/2017)

Roofing, (02/2016-07/2016)

I provided personal hygiene, personal hygiene, and grooming of the elderly in nursing homes—assisted patients who showed advanced stages of mental breakdown with nutrition and physical fitness. I got training to use multiple assisted machinery to lift overweight residents and deal with hostility, physical and verbal abuse from residents with advanced mental health problems and family members. I prepared corpses by washing and dressing them so they could be presentable for the arrival of their family members.

- Took care of 10 residents daily and additional care of 10 residents of a coworker who dipped into my break and lunch break. In night shifts, the standard number of residents I provided care for was 20, where my coworker and I would take turns to care for each other residents during our breaks.
- I trained many students who were taking the CNA course and used them to my advantage to set myself up for the next day and the following week.
